

LabCorp Biometric Screenings

How do I register for a biometric screening?

[Click here](#) to register for a free biometric screening and use the code **USG**.

What should I expect when I arrive?

You will walk in and complete the registration process with our registration coordinator (RC). You will then take a seat and wait to be called by the next available screener.

Each appointment for fingerstick screenings takes about 12 minutes. Once you complete your screening you will then have your results written down on a health education booklet and you can return to your workstation

If you registered using the online portal, you'll receive an email 30 minutes prior to the event start time to pre-register. This will allow you to walk into the event and be seen at your appointment time (wait time dependent). Please let your RC know you are there.

How do I use the QR Code for Check-in?

There will be a QR code available at the registration desk during the event. If you bring your mobile phone, you can scan the QR Code and register on your phone instead of with the staff. Be sure to let the RC know that you have checked in with your own device.

Who can receive a biometric screening?

All participants must be at least 18 years old to participate.

How do I get my results?

Results should be given to you during the appointment along with a health brochure. If testing for PSA or A1C these results will **not** be provided onsite, they will be sent to the Labcorp portal after processing and you can log in online to get your results.

You can also contact Customer Care to obtain your results by emailing support@lescustomercare.zendesk.com or call 844-251-6524 for assistance (Monday through Friday, 9am - 8pm ET).
